

Kings Lake

HOME OWNERS ASSOCIATION

1. **Do NOT put any fertilizer closer than 15 feet from the shoreline.** This buffer zone will enhance the ability of shoreline grasses to stop pollutants from entering the lake.
2. **Do NOT mow closer than 2 feet from the shoreline / allow a 2-foot buffer of tall grass to grow**

These grasses will filter and clean the unwanted nutrients (fertilizers and horticultural debris) from entering the lake. **Here is a photo of the desired shoreline.**
