

# Aquatic Weed Control

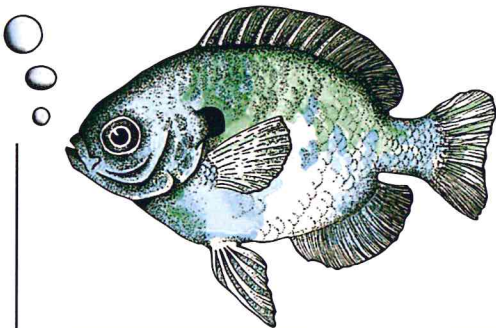

**W**hen aquatic weeds are left to grow uncontrolled, they can interfere with fishing and other water sports, lower dissolved oxygen, interfere with water flow, harm fish and other wildlife and even disrupt boat traffic. Warm weather, imported weed species and high nutrient levels in most lakes, ponds and waterways only add to the problem.

That's where The Lake Doctors can help. We specialize in keeping your lake, pond or waterway in excellent condition year round. By using top quality materials, specialized equipment and innovative techniques, we provide an effective cure for waterway ills without affecting fish, wildlife or desirable weed species.

Our annual water management program can cure existing problems (usually within one to three months) and prevent unhealthy and unsightly weed and algae growth in the future. Specially trained and licensed aquatic biologists perform monthly inspections and treatments which will give you the beautiful lake or waterway you deserve.

Since 1979, we have been successfully serving homeowners associations, developers, municipalities, golf courses, mobile home communities and other residential and commercial property owners.

For a free aquatic inspection, report and water management proposal, call **The Lake Doctors** toll-free, **1-800-666-LAKE** or visit us at **[www.LakeDoctors.com](http://www.LakeDoctors.com)**.

Myers, Jacksonville, Florida Panhandle, South Carolina, Dayton, Cincinnati, Columbus, Cleveland and the Orlando area. Company headquarters at 3523 State Road 419, Winter Springs, FL 32708, **1-800-666-5253**.

# Fountains & Aeration Systems

## FOUNTAINS

**O**ur floating fountains with submersible pumps are not only attractive, they are biologically beneficial because they add needed oxygen to the water. In addition, they are economical, versatile and reliable. These fountains are ideal for ponds or larger lakes. We offer an infinite variety of spray jet and ring configurations with heights ranging from 2' to 100'.

All our fountains feature durable construction of corrosion-resistant materials with pumps and components chosen for efficiency and long term reliability. We offer a complete line of options including programmable lights and spray heights, custom nozzles, wind level controls and more.

## DECORATIVE AERATORS

**D**ecorative aerators are an ideal way to dress up your pond while providing the life-giving benefits of effective aeration. These units move hundreds of gallons of water per minute and are an ideal way to aerate ponds that are less than 6-8' deep. Some models can operate in as little as 24" of water.

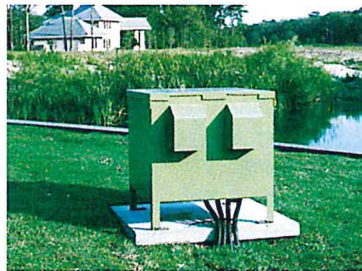

Aeration attacks the causes of water quality problems by increasing the circulation and oxygenation of thermally stratified water to stimulate the natural biodegradation of organic waste, such as grass clippings, leaves, and other nutrient-laden runoff.

## AERATION SYSTEMS

**T**he simple bubbling of air to the surface adds life-giving oxygen to the water and creates a vital circulation pattern. The result is healthier fish, reduced algae growth, fewer dissolved toxic gasses, less odor, elimination of stagnation and lower lake management costs.

**A**eration systems offer many advantages including much lower installation, energy and maintenance costs, more efficient oxygenation and circulation, and simplicity of design. Systems include air compressor, cabinet, weighted tubing and diffuser (airstone) assemblies.

For a free design of a custom system for your lake or pond, call **The Lake Doctors** toll free, **1-800-666-LAKE** or visit us at **www.LakeDoctors.com**.

# Fish Stocking

A healthy and diverse fish population is an important part of creating an environmentally-balanced lake. The Lake Doctors can analyze your needs and provide an appropriate fish stocking program.

Largemouth bass, bluegills (bream) and catfish are native fish commonly used for stocking lakes and ponds.

Lakes with certain weed problems may benefit from an “integrated” water management program utilizing a combination of herbicide applications and stocking with the Triploid Grass Carp, a weed-eating fish, also known as the White Amur.

At your request, The Lake Doctors can outline a stocking program tailored to your needs and budget. We will discuss recommended species, numbers of fish, governmental requirements, expected results, timing and costs. Because availability of most fish is seasonal and variable, we suggest that your requirements be finalized at an early date. For complete information on fish stocking, call **The Lake Doctors** toll-free, **1-800-666-LAKE** or visit us at **www.LakeDoctors.com**.

# Water Clarification/Turbidity Control

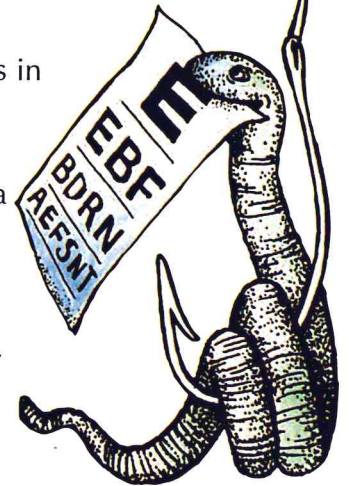

**M**urky, muddy water conditions, known as turbidity, often cause regulatory and compliance problems on construction sites and in new lakes.

The Lake Doctors specializes in clearing up these problems, often within 24 hours. First, we lab test your water with a variety of flocculents,

including aluminum sulphate (alum) to determine the optimum dosage rate. Then we apply the appropriate material evenly to the water by using spray boats equipped with specialized pumps and injection systems.

The guaranteed results are confirmed by lab testing and a written report to the customer. In some cases, we can also set up special flocculent tanks designed to treat turbid water in ditches, canals and pump discharges to bring it into environmental compliance.

For some ponds not requiring clarification treatment, the addition of our economical Blue Pond Dye may improve water color and aesthetics. For a lab test, consultation, report and estimate, call **The Lake Doctors** toll free, **1-800-666-LAKE** or visit us at **www.LakeDoctors.com**.

# Aquascaping/Mitigation

**W**hile you may choose aquascaping to improve the appearance of your lake or pond, state and local governmental agencies frequently require the use of aquatic plants for environmental reasons. This is often called "mitigation". Plants stabilize the soil, absorb nutrients and provide cover and food for fish and wildlife.

We can install the required aquatic species which often includes pickerelweed, arrowhead, canna, cypress trees, water lilies, rushes and others. Additionally, we can provide periodic monitoring and maintenance within the planted areas to assure governmental compliance.

For a specific proposal for mitigation installation, monitoring and/or maintenance, call **The Lake Doctors** toll free, **1-800-666-LAKE** or visit us at [www.LakeDoctors.com](http://www.LakeDoctors.com).

## **Recent Lake Doctors Customer Comments!**

“I would like to express my appreciation for the excellent work we are receiving from the Lake Doctors water management program. Your technician is doing an exceptional job treating the lake and ponds associated with our community.”

“Our community currently has 21 ponds and 29 fountains. Our pond maintenance from Lake Doctors keeps our ponds functioning as intended and the Lake Doctors pro-active approach to fountain maintenance keeps our fountains running successfully with minimal down time due to repairs.”

“A short note to let you know that Eagle Point HOA is very pleased with the service you provide. We are kept well informed of the condition of the lake each time your technician services our lake. Your technician is very professional and it is a pleasure to deal with him.”

“Your technician is very knowledgeable and professional and you are lucky to have him as a representative of Lake Doctors.

“I would without hesitation recommend Lake Doctors. Your personnel are very knowledgeable, professional, courteous and responsive. For the years that Lake Doctors have managed our 5 lakes, we have been very pleased with the quality of service received.”

“Our experience with Lake Doctors during the planning and installation of our 51 unit aeration system exceeded our expectation. The support we have received in the 18 months since installation has exceptional as well.” I have found your personnel to be of the highest caliber.”

“As president of our HOA, I have tried several lake management companies. For any Homeowners Association, large or small, I can state with exception, how pleased we are with the lake and fountain services Lake Doctors provides our Association.”

“I am writing to advise that our Condo Association is very pleased with the work performed by your aquatic technician. We have gotten to the point where the monthly proactive work being done by Lake Doctors is saving me as Community manager, from having to be reactive and request additional calls.”

“I would like to take this opportunity to thank Lake Doctors and especially your employee for the wonderful job that has been done to maintain the ponds. The ponds in our community have improved 100 per cent since being maintained by Lake Doctors.”

“The two small ponds in our community look better than they have in several years!”

“Tom is our Lake Doctor biologist and does a great job. Our ponds always look terrific. The ducks and wildlife think so, too.”

“Thanks for spending time with me yesterday to prepare me to explain things to the residents. You are doing a great job and the dedication you exhibit toward us is really important. The treatment you applied yesterday has already taken hold and there is dramatic improvement today.”

“I would like to recommend Nick, our biologist for the great shape of our lake this year. Algae are down, grasses are under control and the rip-rap is free of growth. Keep up the good work, Nick!”

“Since Garrett has taken control of the maintenance of the pond, and the addition of the triploid grass carp that you so graciously gave us, the pond has made a remarkable comeback. Obviously, we made the right decision to securing the Lake Doctors.”

“My purpose in writing is to complement you for your choice in having such as fine young man as Adam. He is a most accommodating person, focused on providing the best service he can and is extraordinarily conscientious.”

“Jim came to our house to fix our broken fountain in our pond and our experience was very good. The price we were charged was very fair, the time frame was good and the general professionalism he showed gave us a very good overall experience.”

“Zack is very knowledgeable and professional and you are lucky to have him as a representative of your company. He seems determined to clean up our pond. We look forward to working with Lake Doctors and Zack as you continue to care for our pond in the years to come.”

## Recent Customer Comments

“The fountain is running beautifully and both lights are still bright! Thank you for your diligence.”

“We appreciate the good work. Found otters playing in the pond, a sign of a very healthy pond.”

“Our Lake Doctors representative does an excellent job year in and year out and is a credit to your company and the main reason I continue my service each year.”

“My pond is looking so perfect and your technician is a great guy!”

“You’re a great company to work with!”

“The property owner and myself are very happy with the work Lake Doctors have done with our lake and I wish all businesses could have employees as devoted as yours are.”

“I was impressed with your Lake Doctors technician who took time out to genuinely respond to several questions about our lake and fountains.”

“Your employee, Ben, has done a wonderful job on our ponds; they are looking wonderful.”

“Thank you for the wonderful and great job you guys did this year on our community lake. It looks clean and well managed.”

“It is our pleasure to compliment Todd for the positive and caring attention he gives to the waterways at our subdivision. He always gives excellent advice on the little things that will make a difference and maintain water quality.”

Continued...

“Todd’s effort to ensure our ponds are looking their very best really encourages me to refer The Lake Doctors to other homeowner’s association boards.”

“Marion has done a wonderful job on our pond. He treats our pond (and I’m sure others) like his “baby”.”

“Our Lake Doctors lake technician is beyond awesome and always makes sure our pond looks the best it possibly can.”

“We have three ponds on site and they look AMAZING!”

“The customer service provided by The Lake Doctors is absolutely unparalleled. You have provided consistently problem-free service for many years.”

“Jake has done a great job and is also very helpful and professional to work with.”

“Since the installation of the aeration system and fish feeder, the lake has just come alive! The fish, who now have energy because they are property oxygenated, come up after the fish food so fast they jump out of the lake and do cartwheels!”

“Thanks to you, Tim, for your persistence and aid in helping keep our neighborhoods and properties desirable. It is a pleasure to look out our windows and see the fine results.”

“Adam always returned our call promptly alleviated any problems we have had without lake as well as explained to us in terms we can easily understand.”

“Zack came by to treat our pond. He is very knowledgeable and professional.”
