

### **Kings Lake Homeowners Association Mailbox and Lighting Fixture Specifications**

- We have updated the specification standards for our mailboxes, post lights, posts, and brackets. We will post this information on our website, Kings Lake Today. The HOA no longer will provide inventory or labor for their repair or replacement.
- Lights, posts, brackets, and labor can be ordered at **Lighting First – 4600 Tamiami Trail East, Naples**. Finish color must be **black**.
- If so desired, **Lighting First** will provide installation at a price of **\$149, not** including underground wiring.
- The standard, unadorned, U.S. #1 mailbox, 19" L x 9 ½" H x 7" W, can be purchased independently.
- The top of the light fixture will measure 72 inches in height installed, from the ground, not including the finial.
- The post will be three inches in diameter.
- Each fixture should provide 800 lumens, which would be a 60-watt incandescent or 9-watt LED bulb.
- You may also purchase online, independently, a solar powered fixture, *GS-97B-F Gamma Sonic Imperial\** from **GammaSonic.com** (<https://gamasonic.com/product/imperial-bulbsolar-light-w-gs-solar-light-bulb-3-fitter-mount-eagle-acorn-finial/>)

or **Lightup.com**. (<https://www.lightup.com/solar-led-imperial-lantern-light-black-gamasonic.html>)

or **Home Depot**: (<https://www.homedepot.com/p/GAMA-SONIC-Imperial-II-Bulb-1-LightBlack-Outdoor-Waterproof-Solar-Warm-White-LED-Post-Light-with-3-in-Fitter-forLandscape-96B50012/319328643>)

\*This solar powered fixture may be used instead of the 120-volt lamp fixture.
